

EDITOR'S PREFACE

We, with great pleasure, present this issue of Annales Bogorienses. This issue consists of five original papers. We would like to express our gratitude to the authors who have contributed to this issue.

This issue would not have been possible without the great support of the Editorial Board members, and we would like to express our sincere thanks to all of them.

It is our hope that these original papers will be a valuable resource for Annales Bogorienses readers and will stimulate further research in life sciences.
